# SUMMARY

Fresh undergrad ready to face the challenges of the industry.

## Projects

## 1. Robotic Scorpion based on Arduino (Team Project)

Link to Demo

#### **Key Skills:**

Design and modeling the robot and 3D printing parts.

Programming Arduino UNO to control the robot.

Wireless connectivity using Bluetooth and control via Android app.

## 2. Thesis: Response of an SMA-attached Aluminium Cantilever Beam under Forced Vibration

#### **Key Skills:**

Design and Build the Shaker Machine for vibration experiments.

Plan and implement the Data Acquisition System.

Program ESP32 to interface with accelerometer and record data.

Analyze data using Python NumPy and MATLAB.

## 3. Medical Report System

Link to Demo

#### **Key Skills:**

Basic Web development using python web frameworks.

HTMX with Bootstrap for UI.

PostgreSQL database on the backend.

#### 4. Online Fourier Series Calculator

Link to Demo

#### **Key Skills:**

Quick Web development using Streamlit.

Fourier Series Calculation and plot using SymPy.

## EDUCATION

B.Sc (Mechanical Engineering) at **BUET** (CGPA: 2.8/4.0)2020 - 2025 2019 HSC Dhaka Board (GPA: 5.00/5.00)2017 SSC Dhaka Board (GPA: 5.00/5.00)

## SKILLS

Design/Modeling AutoCAD, SolidWorks, Ansys

Arduino, ESP32 Robotics Windows, Linux Operating System

C, Python, Matlab, JavaScript Programming Language

Web Development Flask/Django, Streamlit, PostgreSQL
